Databases & Querying: SQL, Python, Amazon Athena, Amazon Redshift

Data & Reporting: ETL Processes, Data Pipelines, Dashboard Development, KPI Reporting, Data Transformation, Ad Hoc Analysis

Tools: Excel, Power Query, Google Sheets, Microsoft Office Suite

PROFESSIONAL EXPERIENCE

Business Intelligence Analyst

Fortis | Remote | March 2025 – Present

- Maintain and support data pipelines and reporting workflows across BI systems.
- Utilize ETL processes to prepare and transform data for dashboards, reporting, and operational analysis.
- Build dashboards and reporting solutions using Amazon QuickSight, Athena, Redshift, Excel, and Power Query.
- Write SQL queries supporting ad hoc analysis, KPI reporting, and operational reporting requests.
- Collaborate with leadership teams and stakeholders to support executive reporting and QBR materials.
- Partner with teams across the organization to identify reporting needs and develop analytics solutions supporting business operations.
- Manage QuickSight user access and support dashboard governance and reporting accessibility across teams.
- Leverage AI tools and curated automation workflows to improve operational efficiency and reporting processes.

Data Analyst, Power BI

CAMI Energy | Remote | October 2023 – March 2025

- Developed and maintained Power BI dashboards tracking operational KPIs, installation trends, and energy usage metrics.
- Utilized ETL processes to clean and prepare datasets for reporting and dashboard development.
- Collaborated with stakeholders to deliver reporting solutions supporting operational analysis and leadership decision-making.
- Built reporting solutions and visualizations in Power BI to support operational analysis and leadership decision-making.
- Analyzed installation and energy efficiency trends to support program tracking and operational insights.
- Assisted in training team members on dashboard usage, reporting processes, and analytics workflows.

Manager and Keyholder

Premier Pet Supply | Beverly Hills, MI | September 2018 – February 2022

- Combined Excel-based inventory analysis with operational leadership to improve order accuracy and daily store performance.
- Managed day-to-day operations and supported training and development for a team of approximately 50 employees.

PROJECTS

IT Asset Management Dashboard | Power BI, Python

- Developed an interactive dashboard tracking warranty expirations, maintenance costs, lifecycle stages, and compliance risks.
- Built KPI reporting visuals and transformed data using Python and Power BI.
- Identified high-risk assets and prioritized replacements through reporting analysis.

Data Professionals Survey Report | Power BI

- Created an interactive dashboard analyzing survey data from 630 data professionals.
- Designed KPI cards, comparative visuals, and slicers for improved usability.
- Performed data cleaning and transformation directly within Power BI.

Recorded Meteorite Exploration | SQL, Tableau

- Analyzed NASA meteorite data to identify historical and geographic trends.
- Cleaned and transformed large datasets using SQL.
- Built Tableau visualizations highlighting meteorite landing patterns.

EDUCATION

Data Analytics
